Support
smartphone
watertight IP67

+ Sensor
IP68

+ RPM gauge
IP67

+ Cardio-frequency
armband IP67

DATA MEASURED:

Speed (km/h)

Calories (kcal)

Pedalling frequency (RPM)

Cardiac frequency (BPM)

Compatible with the
Strava and **Zwift**
applications

DATA DISPLAY

The data of the waterproof wired sensor of your aquabike is collected and transmitted to your smartphone via a Bluetooth(R) connection or wireless via a free application (Coospo).

You can display your data either on your smartphone using the app or on a counter mounted on the handlebar. You have elements to facilitate your workout.

***"Better tracking
of your health to
adapt your practical
to your fitness"***

WHY A CONNECTED BIKE?

- Customize your training according to your objectives
- Give a sense of purpose to your training at home
- Measure your performances and become fitter
- Make your aquabike training more fun
- Enjoy new experiences
- Bring the magic back aquabike training
- Share your data and challenge your friends (via Strava and Zwift applications)

***Give meaning to your home training
by following your performance
in a fun way!***
